Little humans come into this earth s environment with more wherewithal than we have acknowledged. In more recent years, it seems evident that more parents are realizing humans as higher frequencies whether by intuition or education. The nascent increase in higher level thought, ideas, inventions, technologies, incomes, creativity is physical demonstration of the unlimited energetic essence of humans and that of which we are capable. Facilitating a child s development with this basic perspective in mind can create a broader scenario in which children can personally expand exponentially. They already know.
