

COMPSTAT 2004 - Proceedings in Computational Statistics

By Antoch, Jaromir

Book Condition: New. Publisher/Verlag: Physica-Verlag | Proceedings in Computational Statistics. 16th Symposium held in Prague, Czech Republic, 2004 | Statistical computing provides the link between statistical theory and applied statistics. The content of the book covers all aspects of this link, from the development and implementation of new statistical ideas to user experiences and software evaluation. The proceedings should appeal to anyone working in statistics and using computers, whether in universities, industrial companies, government agencies, research institutes or as software developers | Invited papers.- The history of COMPSTAT and key-steps of statistical computing during the last 30 years.- Hybrid algorithms for construction of D-efficient designs.- Geometry of learning in multilayer perceptrons.- Visual data mining for quantized spatial data.- Graphs for representing statistics indexed by nucleotide or amino acid sequences.- Matrix visualization and information mining.- st-apps and EMILeA-stat: Interactive visualizations in descriptive statistics.- The case sensitivity function approach to diagnostic and robust computation: A relaxation strategy.- On the bootstrap methodology for functional data.- A novel approach to parametrization and parameter estimation in linear dynamic systems.- Statistical analysis of handwritten Arabic numerals in a Chinese population.- Methods and algorithms for robust filtering.- Using GO for statistical analyses.- Computational challenges in determining...

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- *Otis Wisoky*

This publication is great. It is full of wisdom and knowledge You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).

-- *Dr. Everett Dicki DDS*
