DIFFERENTIAL DIAGNOSIS OF SURRA, NAGANA, DOURINE, AND MAL DE CADERAS. Very little convincing work has been done to solve this important question, for the reason that very few workers have had the opportunity of studying more than one of the afiections. In most cases authors have contented themselves with the conclusion that if not identical they are closely allied. Koch, who worked particularly with surra and nagana, considered the parasites and the resulting infections identical, and many others have formed similar conclusions, while Voges and Laveran and Mesnil and others maintain certain differences to exist. Writing of nagana and mal dc caderas, Laveran and Mesnil consider them distinct morbid entities, which can not be separated by their clinical symptoms, and they further maintain that species...
