Natural Energy Works. Paperback. Condition: New. 262 pages. Dimensions: 8.4in. x 5.4in. x 0.8in. In the 1940s, the physician and natural scientist Dr. Wilhelm Reich claimed discovery of a new form of energy which charged up living organisms and also existed in the open atmosphere and in high vacuum. Reichs laboratory and clinical findings indicated this new energy, which he called the orgone, could be photographed and measured, and had powerful life-positive biological effects. Reich trained other scientists and physicians in his findings, and together they set about applying the inexpensive orgone treatment methods - using a device called the orgone energy accumulator - against various illness, including cancer, with remarkably good results. His published findings shocked the scientific world of his day, however, ultimately leading to numerous smear articles in the popular press, and trumped-up charges by a power-drunk Food and Drug Administration. The FDA and investigation lead to a court trial of much greater significance than the better-known Scopes Monkey Trial. Ignoring Reichs evidence and declaring the orgone energy does not exist, US Courts ordered all books on the orgone subject to be literally banned and burned. Reich was thrown into prison, where he died. His work was nearly forgotten except by a small group of supporters. In this book, former university professor Dr. James DeMeo examines Reichs evidence and reports on his own observations and laboratory experiments, which have repeatedly confirmed the reality of the orgone phenomenon. Dr. DeMeo also recounts the observations and experiments of others, particularly physicians working in private European clinics where open use of Reichs controversial orgone energy accumulator proceeds today. This Handbook gives a warning about low-level atomic and electromagnetic radiations, as from nuclear power plants, power-line fields and cell-phones, along with advice on measurement and protection against such toxic energy. The book...
