Excerpt from Branch of Research: Monthly Report of Dendrology, Forest Experiment Stations, Forest Products, Forest Economics, Grazing Research; November 1926 What constitutes a good index? The test is to determine Whether or not an index will serve as a reliable means for the location, with a minimum of effort, of every bit of information in the source covered which, according to the indexing basis, that source contains. To meet this test an index must be accurate, complete, sufficiently precise in the information supplied, and so planned and arranged as to be convenient to use. Existing indexes fall far short of this ideal. In many cases, and; of course somewhat short of it in all cases.
