Createspace Independent Publishing Platform, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.- Reflection and transmission of plane waves propagating in lossless, nonmagnetic and unbounded isotropic media through a plate of lossless, nonmagnetic and bounded homogeneous uniaxial media. - Static simulation of a transmitted RC (2) pulse, through a uniaxial plate, were generated. - The thesis presents the unique Coordinate-free approach in its application. - Only Normal Incidence condition were met. - All final equations, after being formulated and derived in another thesis, were completely included here. - Theoretical analysis were the base onto which the application was modeled; no numerical analysis were needed after using Matlab. - Suitable for both, Engineers and Physicists. - Theoretical foundation is based on Theory of Electromagnetic Waves, by Hollis C. Chen.
